4SIGHT CONNECT™

TRANSFORMING THE FUTURE OF FACILITY OPERATIONS

Designed to transform and convert facilities into smart warehouses – the workplace of the future.

4SIGHT CONNECT
DIGITAL GATE

Merges real-time data collection and on-demand communication with personnel activity, via the world wide web, allowing for better operational decisions.

Transmits highly-visible operational information to personnel such as: appointments/arrivals/departures of shipments, dock status/availability, the time shipments spend at docks and/or facility, operational KPIs, and various alarm conditions.

Promotes effective facility management by providing monitoring tools and maintenance alerts to remotely and successfully manage facility units.

At the core, 4SIGHT Connect products provide data to help facilities adjust for better cost management. It observes and calls attention to lags in production and work inefficiencies to eliminate waste, unnecessary work, and resources for cost efficiency and operational growth.
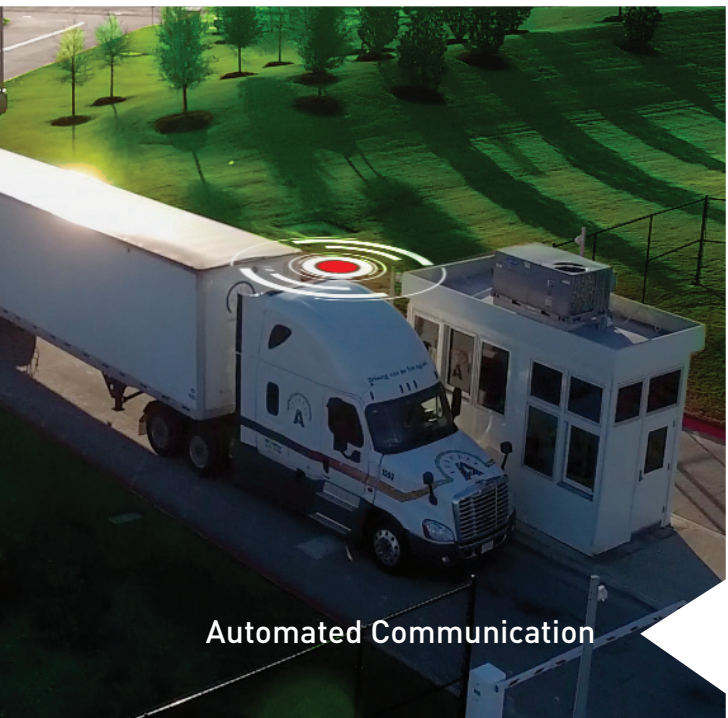

Logistic Optimization = Time and Money

MONITORS. ENABLES. SOLVES.

4SIGHT Connect DIGITAL GATE

CHALLENGE: Drivers arriving early, late or without an appointment. Backed up docks as a result of poor scheduling. Lack of direct communication with drivers.

SOLUTION: Proactively schedules docks for loading /unloading. Sends drivers to the right location, based on availability, upon arrival. Monitors driver's Check-In/Check-Out status and captures metrics on how long drivers spend at facilities. Provides authority to turn drivers away. Simplifies communication between drivers and facilities via text messaging and voice calls. Provides reports and documentation needed to refute detention charges.

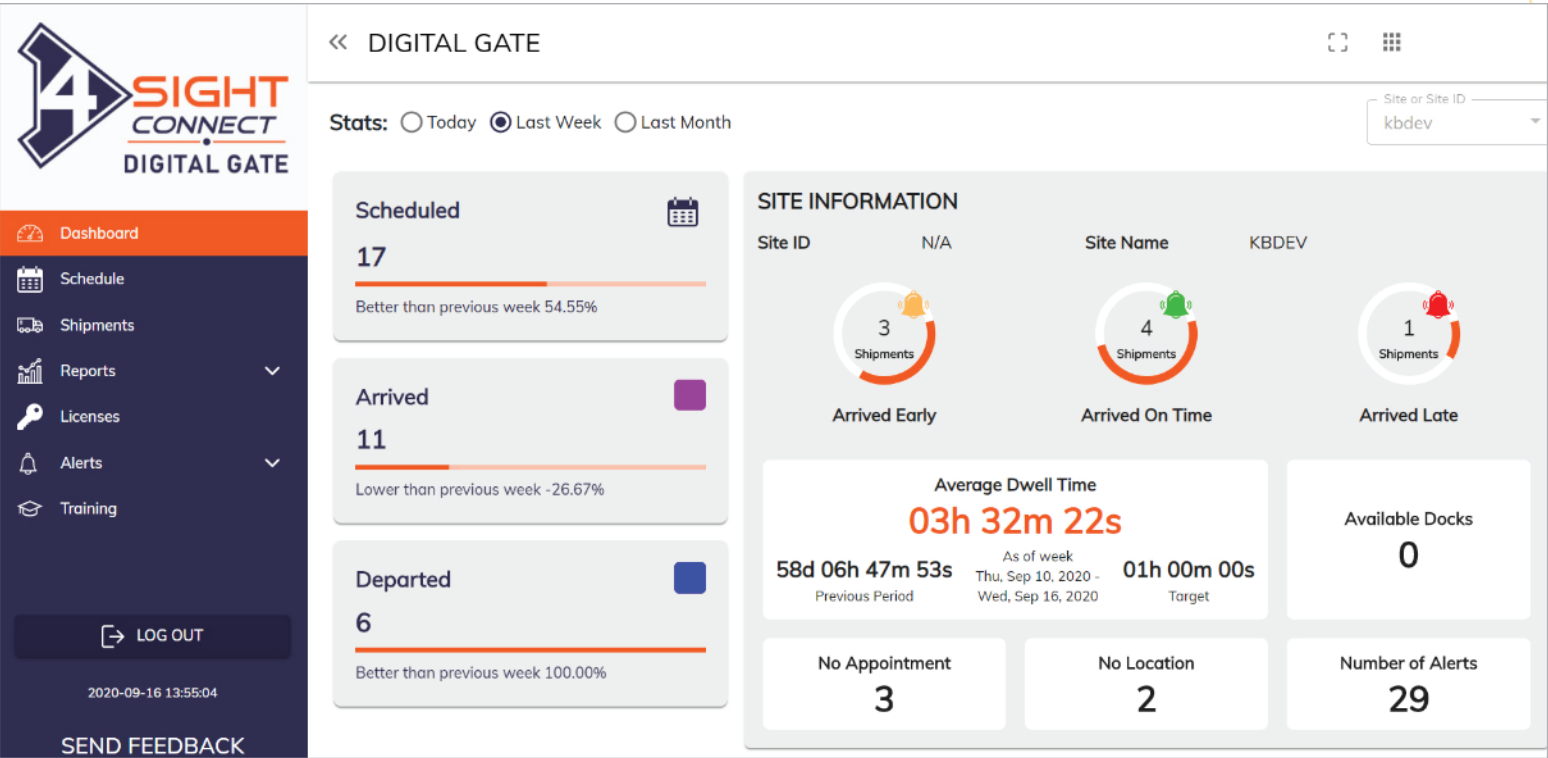

Automated Communication

DIGITAL GATE SOFTWARE

- Schedule Appointments
- Self Check-In/Check-Out for drivers with/without an Appointment
- Interactive Dashboard to View Performance Today, Last Week and Last month
- Manage Arrived Shipments with/without an Appointment.
- View Shipment Status: Scheduled, Arrived, Turned Away, Departed, and Deleted

- Arrived No Appointment
- Schedule Prior 24-hour Reports (*Future*)

KEY PERFORMANCE INDICATOR TILES AND CUSTOM ALERTS

- Average Dwell Time (configurable alert)
- Scheduled Appointments
- Arrived/Departed Shipments
- Early, On Time, Late Shipments (configurable)
- Available Docks
- Arrived No Appointments
- No Location
- Active Alerts

MONITORS Data-Driven Operations

4SIGHT Connect HUB

Includes Mobile Xpress Features allowing drivers to pre-check into facilities expeditiously. Conveniently facilitates the No Touch Access process for drivers, allowing them to **Check-In/Check-Out from the comfort of their truck.**

DRIVER CONTROL SOFTWARE

- Check-In/Check-Out – scheduled/nonscheduled shipments (English/Spanish)
- Gathers Driver Information for On-site Communication

- Driver Interaction with Facilities via Intercom
- Routes Drive to Dock/Designated Location
- Facilitates Gate Access

SOLVES. The Future of a Connected Facility

4SIGHT Connect products allow businesses to visualize, maximize and analyze operational behaviors at their gate, docks and yard. This innovative platform connects logistic processes to the internet for data processing and operational efficiency, making it ideal to run your business intelligently and effectively.
